REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The examiner respectfully asserts that none of the prior art, taken either singly or in combination, is seen to teach or suggest the use of an article cover comprising a sheet of substantially *non-stretchable* fabric attached to the inner edge of a strip of *cross-extensible* fabric having a *substantially uniform* transverse peripheral unstretched width, in which the strip can stretch in a *transverse* peripheral direction by an incremental extension *of at least about 150% of the unstretched width under a tensile force of less than about 160 g/cm of unstretched width* as explicitly recited in Applicants' sole independent claim 1. With regards to the prior art, May, Jr. '280 discloses the use of a covering having an inelastic top portion attached to a plurality of extensible side and end walls; however, the May, Jr. '280 patent is completely silent as to the particular stretchability of the side and end walls and required tensile force associated therewith. Moreover, the Zafiroglu '893 and Zafiroglu '952 patents both disclose the use of a fabric which possesses a stretchability of 150% along the length direction of the fabric as opposed to an extensible fabric which can stretch along a transverse peripheral direction thereof by at least about 150% as specifically recited in Applicants' claims. Hence, it is considered that the application is currently in full and proper condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
